PERCEPTION POINT

Prevention Starts with Perception

Unparalelled prevention of all attacks across email, web browsers and cloud collaboration apps

Perception Point is on a mission to protect all organizations by detecting, investigating and remediating any cyber threat that is delivered via text, files and URLs, across email, web browsers, cloud apps and collaboration channels.

Any Threat. Any Channel. Lightning Fast Detection

Email

Web Browsers

Cloud Apps

ICAP-based Apps

Proprietary Channels

Phishing

BEC

Malware & Ransomware

Zero-days

ATO

> **Perception Point’s solution met all required KPIs in only 1 week. They prevented almost 2 dozen attacks in no time, saving the company severe potential damages. They also didn’t a˜ect t he user experience as promised in the ÿrst pitch.**

PERCEPTION POINT

Why Perception Point?

UNMATCHED PROTECTION AT THE SPEED OF YOUR BUSINESS

Perception Point's SaaS solution is powered by patented detection engines and provides a detection rate of more than 99.95%. Dynamically scanning 100% of content, including embedded ÿles and URLs in just seconds, it eliminates your security blind spots for the best protection of your organization.

COST REDUCTION, SIMPLIFIED MANAGEMENT AND RAPID REMEDIATION WITH A FREE OF CHARGE INCIDENT RESPONSE SERVICE

An all-included Incident Response service combines machine learning, automated processes, and close engagement with our cybersecurity experts, so that every incident is analyzed and managed e°ciently . The service is an extension to your SOC team and ensures continuous optimization of the system's detection rates and rapid remediation across all channels. Your management overhead is reduced and you can save up to 75% of your SOC time.

> **The Perception Point solution is easy and straightforward to deploy. It made an immediate impact on our day to day operation. I can't say enough about the team and how quickly they responded to questions, new feature requests or improvements. Any issue I faced was answered on the same day.**

Unprecedented protection against any attack type
Outperforms all solutions in accuracy and speed

Unmatched detection speed & scale
Lowering dynamic threat analysis time from minutes into seconds

Scan 100% of traffic in real-time
Unlimited scale: scanning every piece of content, regardless of volume

Integrated incident response
All-included incident response serves as a force multiplier to the SOC team

Easy to use, intuitive solution
Simple, easy to operate management dashboard. No long manuals

One-click deployment
SaaS solution deploys in one click with existing security solutions

99.95%
Detection rate

40X
Faster detection

SOC time saving

PERCEPTION
POINT

Eliminate Security Blind Spots with 360° Channel Coverage

Your organization is exposed to external and insider threats from email, web browsers and other cloud collaboration channels. Perception Point holistically protects your main attack vectors, allowing you to easily extend the same policies, consolidate and simplify security systems, and obtain a unified solution that detects, investigates and remediates all threats in the organization.

Email	Cloud Apps	Web Browsers	Proprietary Apps
Office 365 Google Workspace Exchange	OneDrive Sharepoint box salesforce amazon S3 zendesk ICAP	chrome Microsoft Edge Safari	> Inhouse built collaboration apps > File streams coming in through APIs > ICAP-based apps

> **Perception Point has allowed our team to feel at ease when it comes to OneDrive and SharePoint. There is no solution like Perception Point when it comes to o˜er ing true threat prevention for these channels.”**

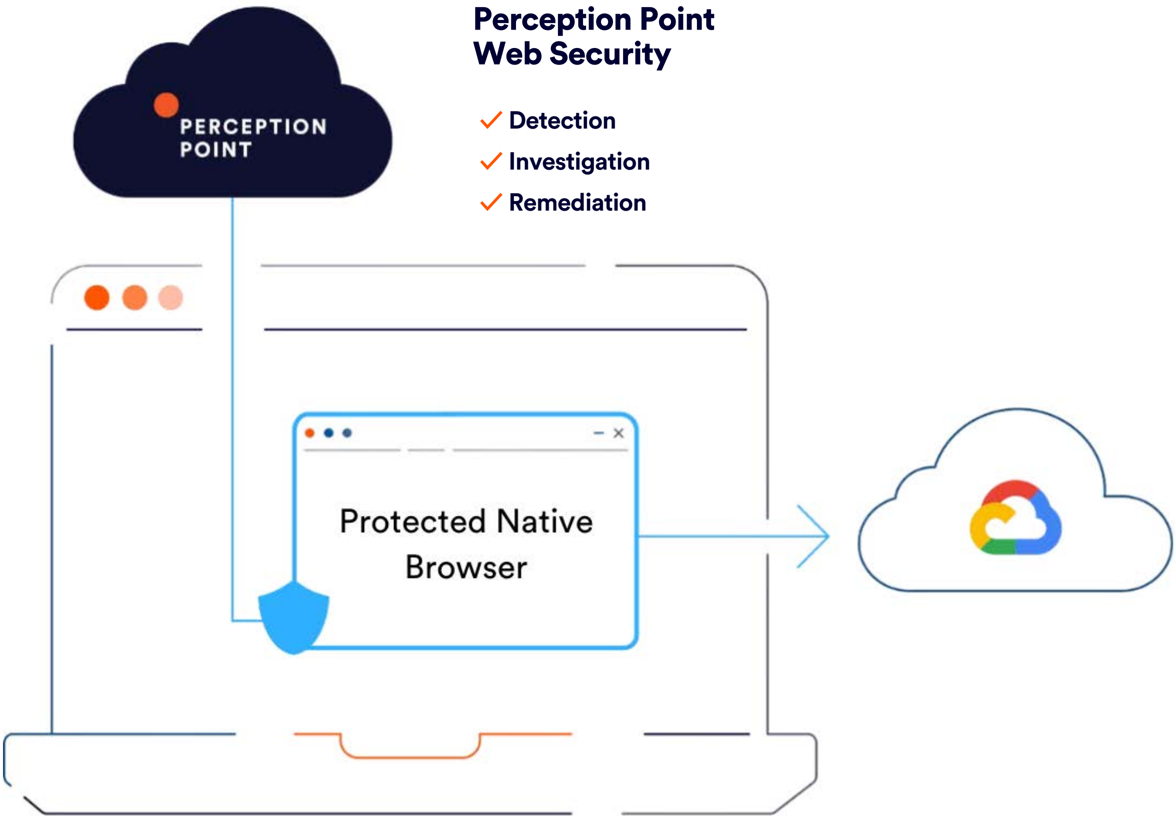
PERCEPTION POINT

Advanced browser-based detection lets your users access the web without exposing enterprise data to risk

Perception Point's Advanced Browser Security is easy to deploy, with a browser extension for advanced detection capabilities. You can prevent all threats from the web and ensure enterprise apps are accessed via your protected native browser.

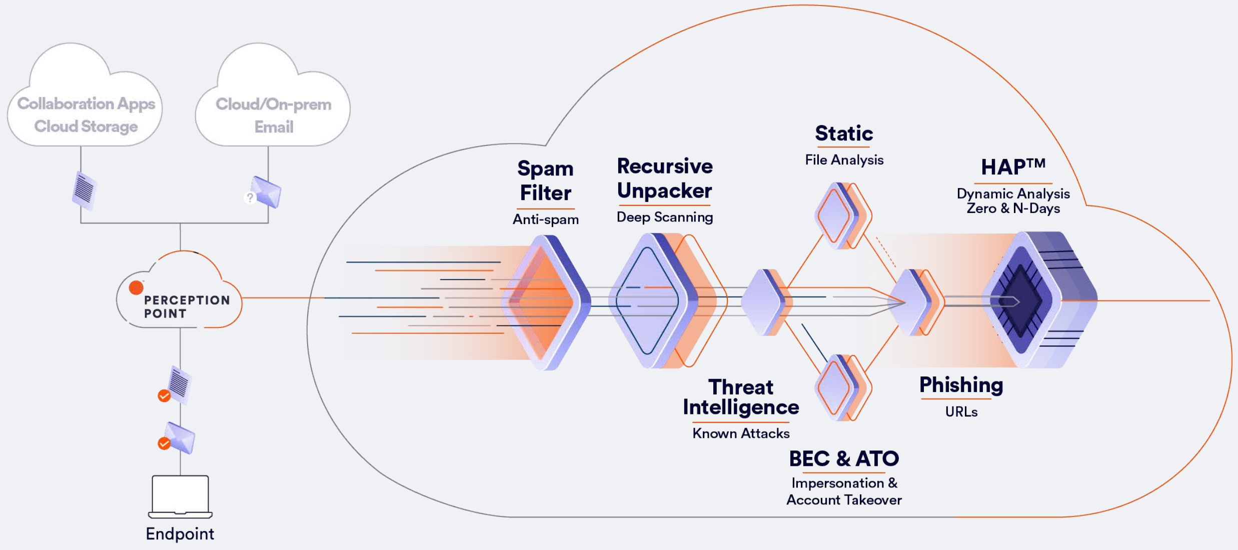


> Perception Point has reinvented how organizations can protect applications and data on users' devices and, by doing so, significantly reduce the risk on the endpoint."
>
> *Adm. Michael Rogers, Former Director of the NSA*

PERCEPTION POINT

Protect Your Organization with Unprecedented Advanced Threat Detection

Perception Point is a pioneer in advanced threat detection. Our platform recursively unpacks every piece of content and rapidly scans all text, ÿles and URLs with multiple advanced detection engines. The di¸er ent engines leverage state of the art detection algorithms using computer vision, machine learning, and various dynamic and static methods, to intercept every type of threat, from commodity attacks to advanced threats.



1

Spam Filter (Email Only)

Receives the email and applies reputation and anti-spam ÿlters to quickly ˝ag an email as malicious.

2

Recursive Unpacker

Unpacks the content into smaller units (ÿles and URLs) to identify hidden malicious attacks, extracting embedded URLs and ÿles recursively by unpacking ÿles and following URLs. All of the extracted components go separately through the next security layers.

3

Threat Intelligence

Combines multiple threat intelligence sources with our internally developed engine that scans URLs and ÿles in the wild to warn about potential or current attacks.

4

Phishing Engines

Combines best-in-class URL reputation engines and an in-house image analysis engine to identify impersonation techniques and phishing attacks.

5

Static Signatures

Combines best-in-class signature based antivirus engines together with proprietary technology to identify highly complicated signatures.

6

BEC & ATO

Prevents payload-less attacks that don't necessarily include malicious files/URLs and Account Takeover attempts with behavioral and contextual algorithms.

7

HAP™ (Hardware-assisted Platform)

Next-gen sandbox proprietary engine that is composed of software algorithms using CPU-level data to access the entire execution ˝o w, right from the processor, to deterministically intercept any type of advanced attack on both Windows and macOS environments. This layer provides unprecedented detection against malicious code execution in scripts and executable ÿles, zero-day and N-day vulnerabilities, logical bugs, next-gen exploitations, ATO and more.
